"EWA-S" (machine screw & nut Steel channel wall)

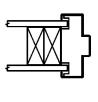

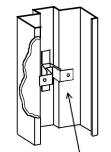

New Steel or Wood Stud Wall Anchor

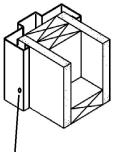

"ST-S" (Steel Stud)
"ST-W" (Wood Stud)

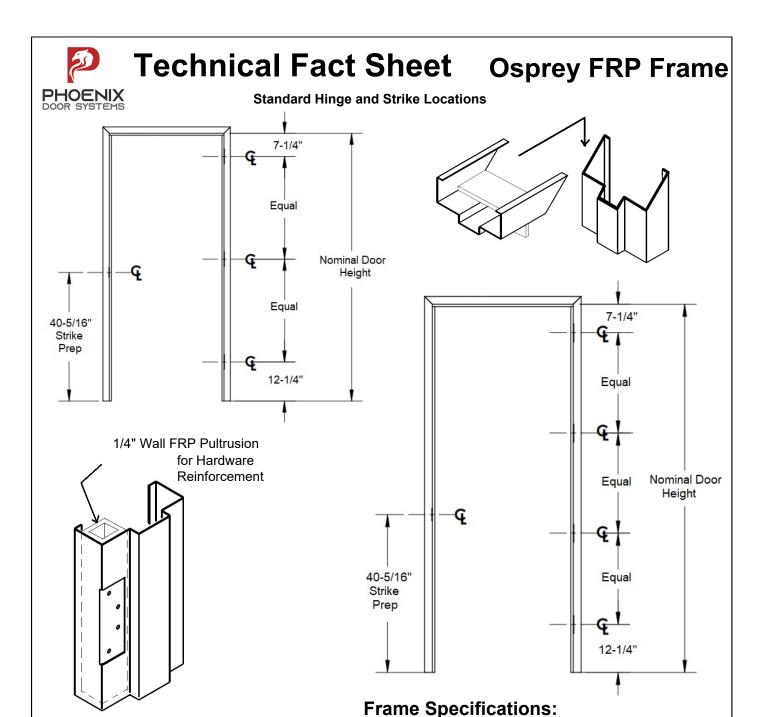

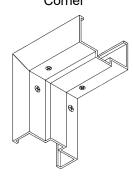

Compression Bar Countersink at Jamb Bottoms

FRP frames shall be manufactured by Phoenix Door Systems, Mason, OH. Osprey FRP frames are corrosion proof, manufactured with 3/16" thick wall FRP pultrusions. Frames are knock down (KD) for field assembly or resin-welded as a standard. Paired frames to ship KD. Head and jamb members of frames have saw-mitered corners. Integral door stops are 5/8" high. Jambs are sized to suit wall applications. Frames have a full lifetime warranty.

Hinge jambs are mortised for 4-1/2" or 5" as specified. Pre-drilled pilot holes. Strike jambs are prepared for specified hardware. Mortar guards are provided.

Finish: Frames are to be supplied with one coat of factory primer or twopart polyurethane enamel finish coating from a selection of standard colors or custom colors as specified.
