

Lightweight, stylish, and dependable!

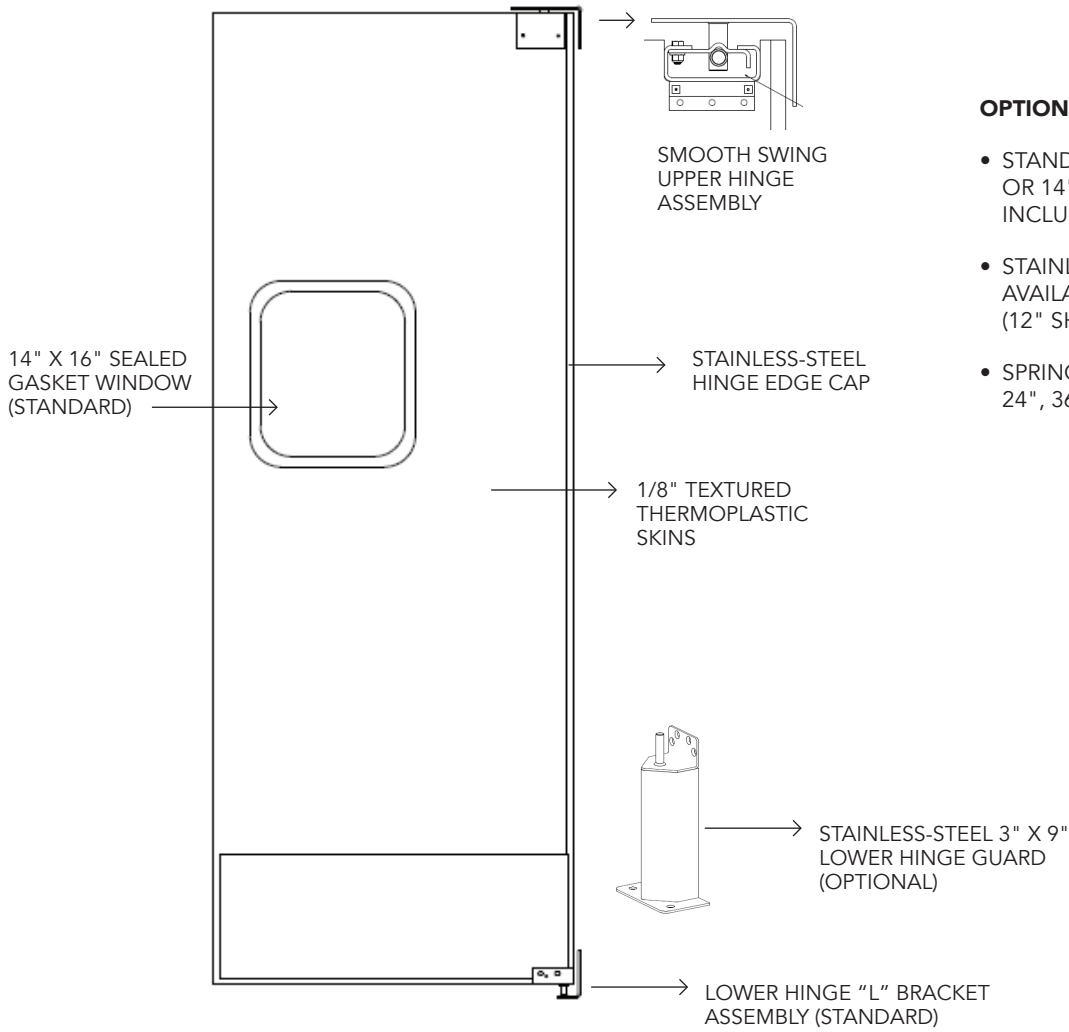

Our Hawk-HC model brings it all!

With the strength provided by the internal PVC framework and honeycomb polymer core bonded to high impact thermoplastic face sheets, the Hawk-HC provides the function and durability required to get the job done. Often used within the Retail, Big Box and Commercial industries, this model is lightweight and allows the ease of movement through the opening for personnel. The Hawk-HC will withstand the heavier carts, conveyances, and manual pallet jacks often found in these environments.
